

Projectidea + Draft

Scenario: When you working with the VR you want to save a specific area of your view.

- Make it possible to save the field of view
 - look over the Picture and filter specific private Data
 - for this project: just a number 1337 is on the captured image and mark this
 - make a notification, that the picture is filtered saved
-
- measures:
 - saving what you see and make it more private
